### **DETAILED ACTION**

This is in response to communication filed 05/03/06.

#### ***Response to Arguments***

Applicant's arguments under double patenting have been considered. The co-pending Application no. 09/749629 has been issued. Therefore, Applicant needs to response to the rejection.

Applicant's arguments under 103(a) have been fully considered and are persuasive. The rejection has been withdrawn.

#### ***Double Patenting***

Claims 9-15, 19-26 are provisionally rejected on the ground of nonstatutory double patenting over claims 44-83 of copending Application No. 09/749629. This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent granted on that copending application since the referenced copending application and the instant application are claiming common subject matter, as follows: detecting a number of users accessed the searchable and retrievable content web site then scanning and

Art Unit: 2161

storing the searchable and retrievable content we site based upon the content has been accessed the threshold number of times by the members of the web host

Furthermore, there is no apparent reason why applicant would be prevented from presenting claims corresponding to those of the instant application in the other copending application. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.
